

AMPPERE CABLE

Website Transformation Report — Simple Summary of Changes

Original Website:	https://www.amppercable.in/
Project Version:	New Modern Cloned Version
Summary Scope:	Design, Features, SEO, Certificates & Content Changes

Summary in Plain Words: The old Ampere Cable website was basic and static. In this new cloned version, the entire website has been redesigned from scratch to look premium, modern, and interactive. Everything has been upgraded—from how the website opens to how products are shown, how cables can be visually inspected layer-by-layer, how fast pages load, how certificates can be downloaded, and how easily Google can find the website.

1. Modern Design & Visual Upgrades

- **New Premium Look & Color Theme:** Replaced the old static layout with a modern red, white, and sleek dark theme that looks high-end and professional.
- **Glass Navigation Bar (Header):** Created a smooth top menu that stays visible at the top as you scroll down. Hovering over menu items shows product categories with picture previews.
- **Mobile-Friendly Menu:** Designed a smooth slide-out menu specifically for smartphones and tablets so mobile users can navigate easily.
- **Hero Banner Slider:** Added a big, auto-sliding banner on the homepage displaying HD images of cables, key highlights, and quick buttons to contact or view products.
- **Modern Footer:** Redesigned the bottom section of the website with direct quick links, business address, quick contact numbers, social media links, and a newsletter subscription box.

2. Cool Interactive Features Added

- **Custom Animated Mouse Cursor:** When browsing on a computer, the mouse pointer has a modern custom design that grows and glows smoothly when you hover over buttons or links.
- **Opening Loading Screen (Preloader):** When someone opens the website, a smooth loading animation appears showing a percentage counter and cable logo before the site opens.
- **Smooth Page Switching:** When moving from one page to another (e.g. Home to About), pages fade smoothly without screen flickers.
- **Interactive 3D Cable Structure Inspector:** Added a visual cable structure tool where users can click to inspect cable layers one by one: *Conductor*, *Insulation*, *Inner Sheath*, *Armouring*, and *Outer Sheath*. It also includes short videos showing how cables are made.

- **Customer Testimonials Slider:** Added a sliding reviews section displaying client ratings, feedback, and customer designations.
- **Interactive Google Map & FAQs:** The contact page now includes an interactive Google Map location, one-click WhatsApp/Call buttons, and expandable FAQ answer boxes.

3. New Pages & Content Sections

- **Product Showcase & Dedicated Product Pages:** Built a clean product showcase where products are grouped into categories. Clicking any product opens a full dedicated page showing technical specifications, usage areas, and a direct inquiry form.
- **Company Blog & Article Section:** Created a full blog hub with a live search bar, topic filters, reading time estimates, and individual article reader pages.
- **Clients Showcase:** Created a dedicated section showcasing top corporate clients like Mahindra Aerospace, BSE, Capgemini, Union, and Nexus with company logos.
- **About & Founder Pages:** Designed detailed pages covering the company's story, leadership vision, manufacturing facilities, quality policy, and core business goals.

4. Quality & Government Certificates Added

Added official government and quality certificates directly onto the website so customers can view and download them easily:

Certificate	What It Proves	Where It Appears On Site
ISO 9001:2015	International Quality Management Standard	Download button on About Page & Footer
GST Certificate	Official Legal Business Tax Registration	Direct downloadable PDF file
RoHS Certificate	Environmental & Hazard Safety Compliance	Downloadable document for B2B buyers
CE Certification	European Safety Standard Approval	Display badge & full image viewer
UL Certification	Underwriters Laboratories Safety Seal	Safety badge on product & quality sections

5. Google Search & SEO Upgrades

- **Automatic Page Titles & Descriptions:** When moving from page to page, the browser title and Google description change automatically for every specific page.
- **High-Ranking Keyword Research:** Researched and integrated search keywords people use on Google when looking to buy cables (like *Fire Survival Cable Manufacturers in India*, *LT Copper Wires*, etc.).
- **Compressed HD Images:** Converted all website images to modern WebP format so images look sharp but load super fast.

- **SEO Strategy Documents Created:** Prepared 3 detailed SEO guides in the project folder covering Keyword Research, Meta Titles, and Image Optimization.

6. Quick Comparison Table

Feature	Original Old Website	New Cloned Website
Visual Design	Basic, static layout	Modern, glassmorphic, red & dark theme
Navigation	Standard basic menu	Mega menu with pictures + mobile menu
Speed & Performance	Slow page reloads	Ultra-fast instant switching (Single Page App)
Cable Inspection	Static photos only	Interactive 3D layer viewer + manufacturing videos
Certificates	Not easily viewable	1-click downloads for ISO, GST, RoHS, CE, UL
SEO (Google Rank)	Very basic	Dynamic titles, meta tags & targeted keywords
